Portfolio

EDUCATION

Indian Institute of Information Technology, Kalyani

2022 – 2026

Bachelor of Technology in Computer Science and Engineering — CGPA: 9.45

Kalyani, West Bengal

Kendriya Vidyalaya Saharsa

2019 – 2021

Higher Secondary Education — Percentage: 89.4%

Saharsa, Bihar

Jay Pratap Singh Public School, Saharsa

2012 – 2019

Secondary Education — Percentage: 92.6%

Saharsa, Bihar

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Operating Systems
- Object-Oriented Programming (OOP)
- Full Stack Development
- Android Development
- DevOps

TECHNICAL SKILLS

Languages: Java, C, C++, Python, HTML, CSS, JavaScript, Scilab

Technologies: Docker, Kubernetes, Android Studio, IntelliJ IDEA, Git, GitHub, AWS, Postman API, MongoDB, MySQL, Redis, Kafka

Frameworks/Libraries: ReactJS, React Native, Spring Boot, Flask, Node.js, Express.js, Tailwind CSS, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PyTorch

PROJECTS

GeoPV | React, Flask, Redis, YOLOv12, OpenCV

April 2025

- Developed a rooftop solar potential analyzer using a YOLOv12 model trained on around 400 Indian satellite images, achieving 72% Precision and 69% Recall.
- Integrated Redis for background task queueing and React for a map-based UI with interactive result visualization.
- **GitHub Repository:** <https://github.com/harshrox/GeoPV>
- **View demo:** [YouTube](#)

Algorithm Visualizer | React, TypeScript, Tailwind CSS

March 2025

- Created an interactive web application to visualize graph algorithms such as BFS, DFS, Dijkstra, and A*.
- Integrated dynamic maze generation, pathfinding, and adjustable speed controls for better visualization.
- **GitHub Repository:** <https://github.com/harshrox/Algorithm-Visualizer>
- **Live site:** [Algorithm Visualizer](#)

WildTrek | React Native, Flask, MongoDB, PyTorch, REST API, Deep Learning

August 2024

- Led a team of 4 at the 36-hour offline hackathon StatusCode1 to build WildTrek, a wildlife exploration app with image and audio recognition and a real-time animal alert system.
- Implemented a One-Click Alert System for species recognition and an integrated Nearby Vet Locator to find veterinary clinics based on the user's location.
- **GitHub Repository (Frontend):** https://github.com/harshrox/WildTrek_Frontend
- **GitHub Repository (Backend):** https://github.com/harshrox/WildTrek_Backend

Code Editor | HTML, Tailwind CSS, JavaScript

February 2024

- Built a web application that allows users to seamlessly code HTML, CSS, and JavaScript while providing live previews of their work.
- **GitHub Repository:** <https://github.com/harshrox/Code-Editor>
- **Live site:** [Code Editor](#)

ACHIEVEMENTS

- Solved 800+ DSA problems on LeetCode.
- Knight at LeetCode, ranked in the top 5% of LeetCode contests.
- 3 stars in problem solving on HackerRank.
